

Project Development Phase

Functional & Performance Testing

Date	30 September 2026
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Functional & Performance Testing :

Project team shall test the functionality and performance of the Script-Controlled ACL system by verifying READ, CREATE, WRITE, and DELETE access, role-based and Branch-based record restrictions, ACL response, record loading, and access control for different user roles.

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	READ ACL – EEE Access	Login with bb1 role and open Institution Details records	Only EEE branch records should be accessible	Only EEE branch records were accessible to the bb1 user	Pass
FT-02	Unauthorized READ Access	Login without bb1 role and open Institution Details	Records should not be accessible	User without bb1 role could not access the records	Pass
FT-03	Admin READ Access	Login as Admin and open Institution Details	Admin should access all records	Admin user could access all branch records	Pass
FT-04	CREATE ACL	Login with bb1 + bb2 roles and select New	New record option should be available	User could create a new record	Pass
FT-05	WRITE ACL	Login with bb1 + bb2 + bb3 roles and edit an EEE record	EEE record should be editable	User could edit EEE records	Pass

FT-06	DELETE ACL	Login with bb1 + bb2 + bb3 + bb4 roles and delete an EEE record	EEE record should be deleted	User could delete EEE records	Pass
PT-01	ACL Response Time Test	Measure response time while accessing Institution Details records	System should respond successfully	ACL validation and record access responded successfully	Pass
PT-02	Record Load Test	Open Institution Details with multiple records	Records should load successfully	Institution Details records loaded successfully	Pass
PT-03	Multiple User Access Test	Test authorized and unauthorized users	ACL rules should be consistently enforced	ACL rules were correctly enforced for different user roles	Pass
