| Project Name  | Script-Controlled ACL – Restrict Record Access Based on Field Value |
| Maximum Marks | 3 Marks                                                             |

### User Acceptance Testing :

#### Project Overview

**Project Name :** Script-Controlled ACL – Restrict Record Access Based on Field Value

**Project Description :** A ServiceNow ACL system that controls record access based on user roles and the Branch field.

**Project Version :** 1.0

**Testing Period :** 30 September 2026 to 30 September 2026

#### Testing Scope :

- Role-based record access
- Branch-based record access
- READ, CREATE, WRITE and DELETE ACL operations
- Admin full access
- Authorized and unauthorized user access

#### Testing Environment :

**URL/Location:** ServiceNow Lab Instance

**Credentials:** Project test user accounts

## Test Cases :

| Test Case ID | Test Scenario            | Test Steps                                             | Expected Result                          | Actual Result                   | Pass/Fail |
|--------------|--------------------------|--------------------------------------------------------|------------------------------------------|---------------------------------|-----------|
| TC-001       | EEE User READ Access     | Login with bb1 and open Institution Details            | EEE records should be accessible         | EEE records were accessible     | Pass      |
| TC-002       | Unauthorized READ Access | Login without bb1 and open Institution Details         | Records should not be accessible         | Records were not accessible     | Pass      |
| TC-003       | Admin Access             | Login as Admin and open Institution Details            | All records should be accessible         | All records were accessible     | Pass      |
| TC-004       | CREATE Access            | Login with bb1 + bb2 and select New                    | User should be able to create a record   | Record was created successfully | Pass      |
| TC-005       | WRITE Access             | Login with bb1 + bb2 + bb3 and edit EEE record         | User should be able to edit the record   | Record was edited successfully  | Pass      |
| TC-006       | DELETE Access            | Login with bb1 + bb2 + bb3 + bb4 and delete EEE record | User should be able to delete the record | Record was deleted successfully | Pass      |

The UAT template specifically includes **Test Case ID, Scenario, Test Steps, Expected Result, Actual Result and Pass/Fail**, so those columns should remain in the submission.

## Bug Tracking

**No bugs were identified during testing.**

## Sign-off
